## PROJECTS

### CoFlow | NextJs, Convex, Clerk

[Live](#) | [GitHub](#)

- CoFlow is a collaborative platform designed for efficient team collaboration, brainstorming, and project planning. It provides a virtual canvas for teams to ideate and innovate in real-time.

### Terminal theme portfolio

[Live](#) | [GitHub](#)

- Linux terminal inspired portfolio where you can run commands to see about, projects and socials

### GeminiAI

[Live](#) | [GitHub](#)

- Developed a clone of Gemini AI using React.js, aiming to replicate its core functionalities and user interface.

### TODO CLI App | GOLANG

| [GitHub](#)

- A simple command-line todo application written in Go. This app allows you to add, complete, delete, and list todo tasks with a user-friendly, color-coded output.
